Education

University of North Carolina at Charlotte – Bachelor of Science in Computer Science

Concentration: Software/Systems/Networks | Minor: Mathematics Charlotte, NC – May 2020

Honors: Dean's List: Spring 2018, Chancellor's List: Fall 2018

Technical Skills

• Fluent in English and Spanish

• **Languages**: Ruby on Rails, Java, Java Servlets, Ruby, C++, Python, HTML, CSS, JavaScript

• **Software**: Android Studio, Pycharm, Eclipse, Microsoft Visual Studio

• **Platforms**: Windows, Linux

• **Proficiency**: Git

Certifications

• TestOut Security Pro

• Palo Alto Networks Certified Cybersecurity Associate (PCCSA)

Experience

Pike Engineering – Raleigh, NC Student Intern – May 2017 to Present

• Model the existing electric distribution grid in CYME and analyze potential upgrades to ensure power quality and reliability as new renewable distributed generation interconnects, resulting in the release of 15 projects into Duke Energy's electric distribution system.

• Execute short circuit calculations, run load flow simulations for Independent Power Producers to study viability of interconnection to Duke Energy's electric distribution system.

• Provided edits to Standard Operating Procedures (SOPs) for certain high-level study methods.

• Process Independent Power Producers' requests to generate on Duke Energy's electric distribution system. Document Pre-Request, Pre-Application, Fast Track, and Supplemental Review findings along with reporting to developers on the status of their projects.

Old Dominion University – Norfolk, VA Undergraduate Researcher – May 2019 – August 2019

• Root an android device and install a keylogger, along with building an android application to record accelerometer data and save to a csv file.

• Create a datagram from individual key accelerometer data and perform data exploration to prepare datagram to be used in a recurrent neural network.

Achievements

• NASA Aerospace Scholar: Spring 2016

Community Service

• Note Taker for Department of Disability Services
