User Stories

Done

1. As a user, I want to be greeted with an informative homepage. (Josias, Liz)

2. T1 As a user, I want to be able to randomly generate a date with details at the click of a button. (Liz, Josias, Jason)

3. As a user, I want to be able to view all date ideas. (Kaha, Jason, Josias)

4. As a user, I want to be able to submit a new date idea. (Josias, Liz, Jason)

5. T2 As a user, I want to be able to view an individual activity after I submit it. (Jason and Kaha)

6. T3 As a user, I want feel safe knowing this app supports safe dating principles. (Kevan)

7. T4 As an admin, I want to have to log in to view all users' submissions so users cannot access this data. (Liz)

8. As an admin, I want to be able to edit user submissions. (Jason, Liz)

9. As an admin, I want to be able to delete user submissions. (Jason)

10. As an admin, I want to be able to approve user submissions, adding them to the live database. (Liz)

To Do

+ Add a card

Backlog

1. As a user, I want to be able to specify what region/neighborhood I want my date ideas to be generated in

2. As a user I want to be able to search through all available date ideas

3. As a user, I want to be able to choose how many activities and food locations I want generated

4. As a user, I want to see the specific type of activity or food suggestion, such as a museum, a theme park, a food truck, or a fancy restaurant.

5. As a user, I want to be able to tell the app to include or exclude specified types of activities or foods from my generated date.

6. As a user, I want to be able to tell the app to include a specific date spots along with the random places it suggests

+ Add another card

Features

All features can be traced by number to the User Stories (Figure 2).

Current Features

1. Users are greeted with the home page
2. Users can click a button to generate a date consisting of an activity and food suggestion, including the name, description, link, and location of both
3. Users can view all available date ideas (activities and food suggestions)
4. Users can submit new date ideas for review
5. Users can view the submitted date idea after submission
6. User can click a link to visit a website recommending safe dating practices
7. Administrators can sign in to view user submissions
8. Administrators can edit user submissions
9. Administrators can delete user submissions
10. Administrators can accept user submissions as a date idea

Future Features

1. Users can select their prefered location for generated dates
2. Users can search through all date ideas
3. Users can choose how many activities and food locations are generated
4. Users can see the specific type of activity or food location
5. Users can specify what types of activities and food locations are generated
6. Users can select a specific date idea and randomly generate the rest of the date

Testing

We used Rspec for all test cases. Our test cases are labeled in green in the User Stories (Figure 2) and marked T1-T4, respectively.

Test 1

For this test we aimed to test that our app was correctly implementing some of the crud functionality of our app. We have two completely different types of arrays, one for food objects and one for activity objects. We wanted to test that our generator controller correctly can add to the food and activity array. This would ensure we would both be able to display food, and activity ideas, and add to the databases.

Test 2

We also tested to ensure that the user would see their date idea after hitting submit. Here they would be able to see the Name, Type of, Information on, and the location of the generated activity.

Test 3

This test checks that every page includes a link to safe dating practices to encourage our users to be safe.

Test 4

For this final test, we tested to ensure that the everyday user would be unable to submit a date idea directly to the live database without admin approval. The test “visits” the user submission index path and expects a block because there is no admin login given. This supports the safety of our users, and prevents harmful or fake submissions from users.

Ethical Considerations

User Data

In regards to User data, with our limited experience in Software Design and Implementation along with Security, we knew it would be almost impossible to safekeep the data from our users. This was the utmost ethical concern we had, as such we decided not to store User data at all. While this may seem counterintuitive as the current norm in Software Development is dependent on User data for various operations, it simply was not a requirement for the functionality of our application. Our application generated random dates for the user to go on without any weight to any category. By not safeguarding user data, we avoid any risk of User PII data loss. Which is a major concern in today's technical climate. Doing this also aleves the user from the worry of their data being mined and harvested for behavior patterns and third party selling of data. Which is also a major issue in today's technical climate.

Safe Dating Practices

One of the concerns we had with users utilizing our application is that they would be meeting people up potentially on their first date while not really knowing the other person. While this is all fun and adequate, we wanted to bring awareness to safe dating practices. We knew that by creating our application we could influence dating and we wanted to make that influence positively. In the future we plan to be more outspoken about it throughout our application, but as of right now it is simply a link to safe dating guidelines which are accessible throughout the entire application. This was also done to encourage users to be respectful to one another. As the suggestions of dates are within our power, however any extension after that is out of our control.

User Safety

In order to encourage user safety administrators vett each user date submission. Administrators look into the crime rates of the areas of the sites and if the crime rate is particularly high, such as over 75% then the date's are deemed unsafe and not added into our database. This in turn however, could also be seen as discriminating against the businesses for being in an area whose statistics they have no control over. We have not yet figured out how to balance this, however this is something that is of matter to our team and of great ethical concern. As striking the right balance of the two is a tricky measure to achieve.

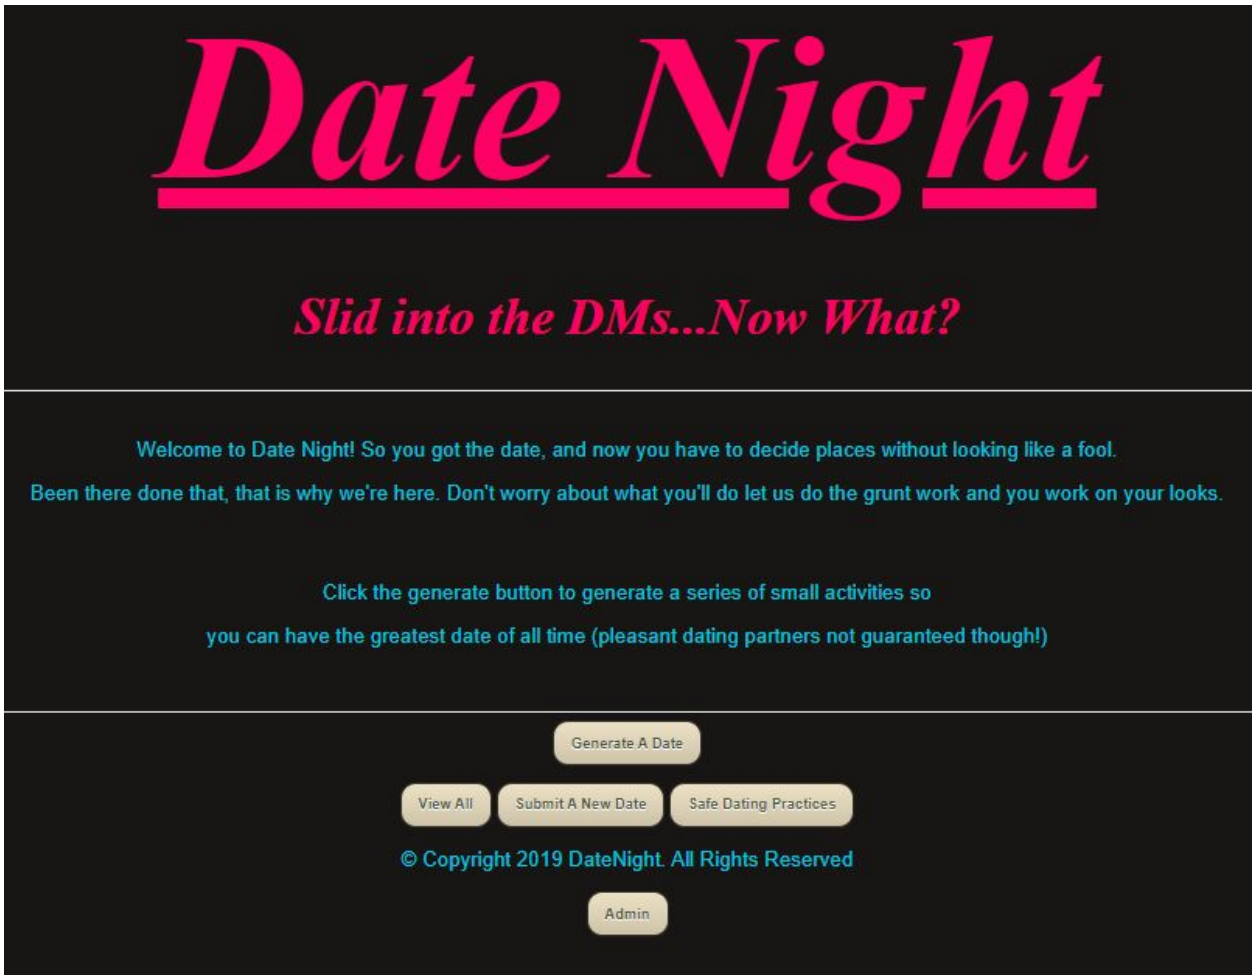
Unweighted Random Generation

In order to not discriminate or favor any of the vendors and businesses in our database we decided to do an unweighted random generation. While the generation in abstract nature is not 100% truly random, it is as random as our current technological advances allow us. There is also no favorable weight for any business or vendor. By doing this we avoid any ethical concerns regarding favoritism of certain activities or vendors while also protecting the application from being influenced by any vendor or business.

User Guide

Navigation

1. When visiting the website, you will first be greeted with the home page.
2. There are navigational buttons at the bottom of every page which lead to various pages around the app as follows:
    - Generate A Date - leads to a page to generate a random date idea (see “Generating a Date” below)
    - View All - view all date ideas in the database in a table format (see “Viewing All Dates” below)
    - Submit A New Date - submit your own date idea (see “Submitting a Date Idea” below)
    - Safe Dating Practices - leads to another website containing tips on how to date while keeping your personal safety in mind
    - Admin - leads to the Admin dashboard to edit, delete, and approve user submitted date ideas (see “Admin Guide” below)



Generating a Date

1. To generate a date, first click the “Generate A Date” button located with the navigation links at the bottom of the page.

2. This will take to a page with information about safe dating practices. Be sure you are familiar with how to stay safe before proceeding.
3. To generate a date, click “Generate My Date”.

4. Your generated date contains one activity to do and one place to eat. Each suggestion’s name, along with a description, link, and location is displayed under the Activity and Food headers.

Viewing All Dates

1. To view all date ideas, click the “View All” button located with the navigation links at the bottom of the page.

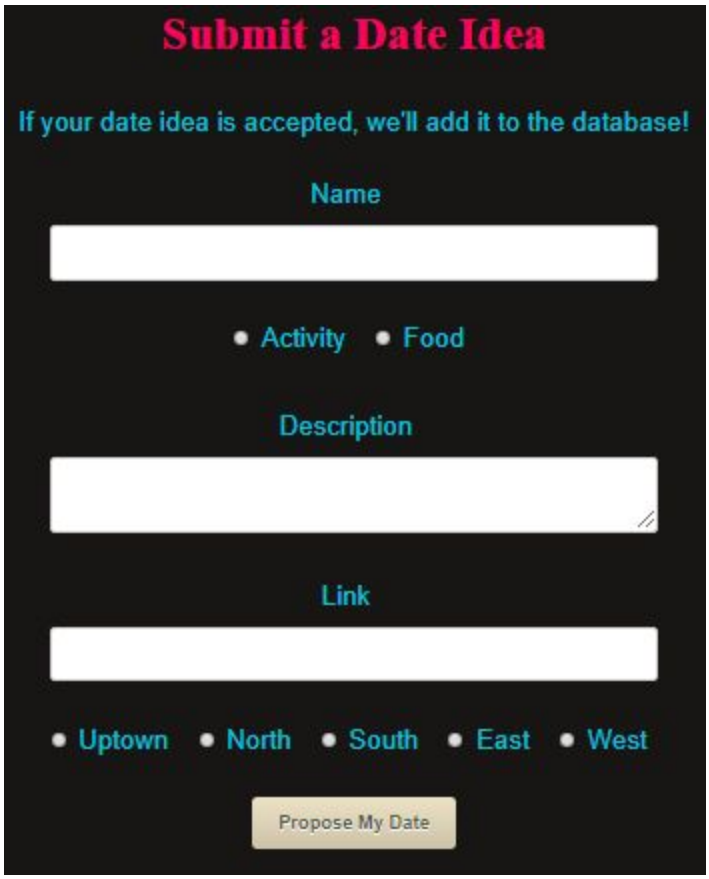
2. This will take you to a page containing a table filled with all date ideas in the database, sorted with newly submitted ideas at the bottom.
3. The columns contain information about each date idea:
    - Name - the name of the activity, business, event, etc
    - Type - the category of the date idea, whether food or activity
    - Info - some information about the activity
    - Link - a link to the website for the activity
    - Location - the part of the city the activity is located in

Name	Type	Info	Location	Link
Inner Peaks	activity	Indoor rock climbing, yay!	north	Rocks.com
Quickly	food	The best bubble tea around.	north	http://www.quicklyusa.com/charlottenc.html
Amelie's	food	A Charlotte icon! A quirky french bakery and cafe with unique decor.	uptown	https://ameliesfrenchbakery.com/
Pho Hao	food	A great selection of traditional Vietnamese dishes and noodle soups.	south	Noodles.com
Mint Museum	activity	A large art museum with a wide selection of paintings, sculptures, and seasonal installations of various mediums.	uptown	https://mintmuseum.org/
Cinemark Movie Bistro	food	A movie theater with large, comfy seats featuring a great menu and full bar. Dine while you watch!	south	https://cinemark.com/theatre-search
Victory Lane Karting	activity	Real. Indoor. Go-carts. Fast and loud!	north	https://www.victorylanekarting.com/
Discovery Place	activity	A huge science museum! Kid friendly, but tons of fun for adults too. Monthly themed adult-only events with bars on every level.	uptown	https://science.discoveryplace.org/

Submitting a Date Idea

1. To submit a date idea of your own, click the “Submit A New Date” button located with the navigation links at the bottom of the page.

2. This will take you to the date submission page.
3. Fill in the form as follows:
    - Name - the name of the activity, business, event, etc
    - Type - the category of the date idea, whether food or activity
    - Description - some information about the activity
    - Link - a link to the website for the activity
    - Location - the part of the city the activity is located in
4. When the form is complete, click “Propose My Date”.



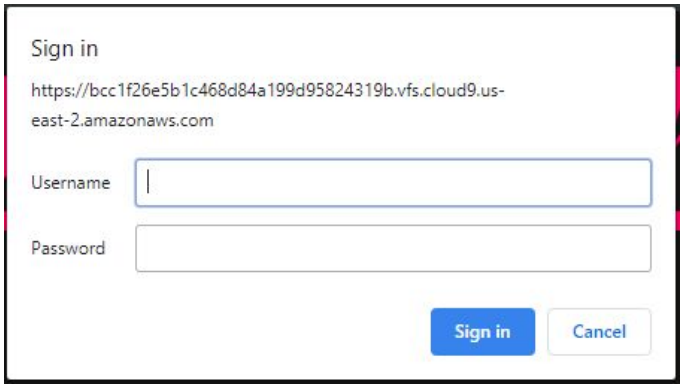
5. Now you should see “Your date idea has been submitted for review” followed by the details of your date idea submission.

6. Now all you have to do is wait for the admins to decide whether to accept your date or not.

Admin Guide

1. Admins for the app monitor user submitted date ideas through the Admin page.
2. To navigate to the Admin page, click the “Admin” button underneath the other navigation links at the bottom of the page.

3. This will prompt for the admin username and password. For testing purposes, use these credentials:
    - Username: admin
    - Password: password



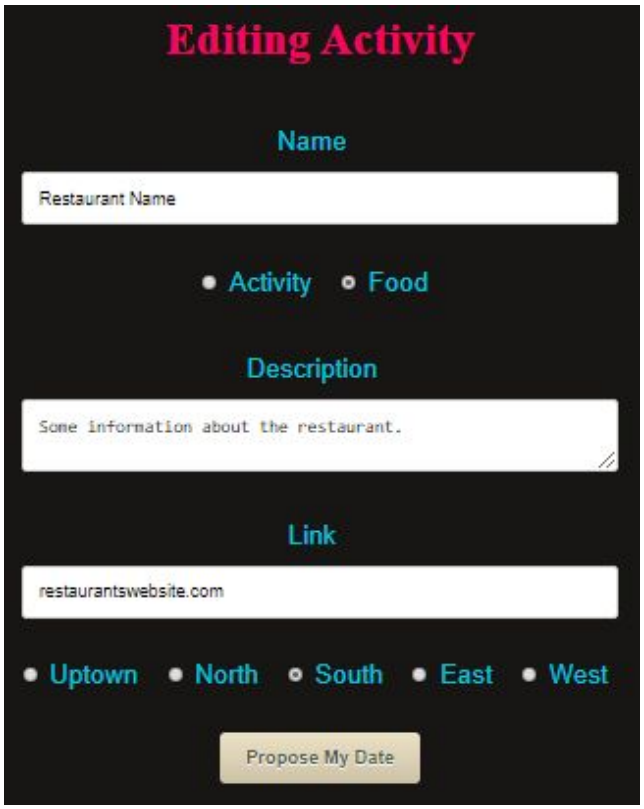
4. This will take you to a page containing a table of all current user submissions.
5. The following options are available for each user submission:
    - Edit - edit this user submission (see “Editing a User Submission” below)
    - Delete - delete this submission (see “Deleting a User Submission” below)
    - Accept Submission - add the date idea to the live database for all users to access (see “Acception a User Submission” below)

Name	Type	Info	Location	Link	Edit	Delete	Accept
Daniel Stowe Botanical Gardens	activity	Botanical gardens with plenty of beautiful plants and seasonal exhibits year round.	south	https://www.dsbg.org/	Edit	Delete	Accept Submission
Mac Tabby's	activity	An adorable cat cafe in Noda. They have snacks and coffee, and they regularly offer cat yoga!	uptown	https://www.mactabby.com/	Edit	Delete	Accept Submission
Swirl		A build-your-own-cupcake bakery!	south	https://swirlclt.com/	Edit	Delete	Accept Submission
Sabor Latin Street Grill		Quality Latin street food! $1 tacos autenticos all day Tuesday and 3-5pm Monday-Friday.	uptown	https://saborcharlotte.com/	Edit	Delete	Accept Submission
Restaurant Name	food	Some information about the restaurant.	south	restaurantswebsite.com	Edit	Delete	Accept Submission

Editing a User Submission

1. To edit a user submitted date idea, click the “Edit” button next to the date idea you wish to edit.

2. This will take you to a form similar to the form used when submitting new date ideas, but already filled out with information from the selected user submission.
3. Make the intended changes to the user submission.
4. Click “Propose My Date” to save the changes.



5. If changes are successful, you will see “Your date idea has been submitted for review” followed by the new details of the submission.

6. The updated date can now be viewed in the table on the Admin page.

Deleting a User Submission

1. If a user submission is beyond saving with an edit, you can delete it.
2. Click the “Delete” button next to the date idea you wish to delete.

3. You will be prompted “Are you sure?”. Click “Okay” if you wish to proceed.

4. The date has now been removed from the user submission database.

Accepting a User Submission

1. If a user submitted date idea is perfect for our users, you can approve it and add it to the live database for all users to see.
2. Click the “Accept Submission” button next to the date idea you wish to approve.

3. This will take you to a page that says “User Submission Accepted” followed by the details of the new date idea.

4. The user submission has now been removed from the user submission database and added to the live database of date ideas.
